

DecoTEC's range of equipment saves the job

ABRASION SYSTEMS

REF No. D/A-4

Client: Shearer Contracting
Location: Singleton, NSW
Project: Refurbishment of coal mine loader

In 2007 DecoTEC successfully completed the refurbishment of Coal Feeder 3 in their Bulga Coal mine. Bulga Coal are part of Xstrata Coal group which has shares in thirty mines in Australia, South Africa and Columbia.

Bulga Coal was so impressed with the results that requested DecoTEC do further works this year, refurbishing their coal feeder system.

With a lead time of only one week DecoTEC had to mobilise quickly. Bulga Coal's stringent regulations demand that all electrical and hydraulic machinery be checked and tagged by their onsite electricians and mechanics.

DecoTEC employed operators who had already completed training in confined space – an absolute must when completing work on mine sites throughout Australia.

With two days for inductions, work methods and machinery safety checks completed, DecoTEC set up their saws and diamond drills on Feeder 4.

or injuries and well before the scheduled deadline, making up for time lost previously and reducing the main contractors exposure to LD's.

“DecoTEC were professional and safety conscious, and always willing to adapt and improve their safety systems without compromise to schedule.”

The work crew and Bulga coal Safety coordinators carried out a final safety review. All safety systems were signed off and the job commenced immediately, despite the temperature reaching mid 40 degree celsius the crew pressed on rotating breaks to avoid heat stress.

Because DecoTEC have certified OHS&E systems in place we were able to satisfy the client that we could complete the works safely, and indeed, the works were completed with no loss of time, equipment breakdown
